

Manusha Ranaweera

Full Stack Developer | Colombo, Sri Lanka

Email: kawshanmanusha7@gmail.com | Phone: +94-77-573-0063 | LinkedIn: linkedin.com/manusha-ranaweera | GitHub: github.com/manusha0652

Profile

Full Stack Developer with hands-on experience building and maintaining backend applications using **Core Java** and **Spring Boot**, designing **RESTful** and **streaming-based API servers**, and delivering responsive front-end interfaces using **React** and **TypeScript**. Experienced in **Agile delivery environments** using **Git**, **Jira**, and structured code review workflows. Developed and integrated **AI and agent-based capabilities** using the Gemini LLM API in a live enterprise environment. Strong foundation in **SQL databases**, **microservices architecture**, **CI/CD pipelines**, and **secure software development** practices. Comfortable adapting to evolving requirements and contributing collaboratively within dynamic engineering teams. Actively seeking a full-time Full Stack Developer role to build scalable, production-grade software solutions.

Experience

Software Engineering Intern

Nov 2025 – Apr 2026

Zebra Technologies, Sri Lanka

- Developed and maintained enterprise backend applications and **RESTful API servers** using **ASP.NET Core**, supporting seamless client-server API interactions across enterprise systems.
- Built a front-end web application using **React** and **TypeScript**, collaborating closely with backend developers to implement consistent client-server communication.
- Developed an **AI-powered chat assistant** using the **Gemini LLM API** — demonstrating experience with **agent-based coding assistant tools** and AI integrations in production systems.
- Participated in **peer code and design reviews**, ensuring high-quality deliverables and maintaining coding standards across the team.
- Authored comprehensive **technical documentation** covering system architecture, API usage, and developer onboarding — supporting Confluence-style knowledge management.
- Identified and resolved software bugs across the codebase, contributing to system reliability and **continuous improvement** of delivery processes.
- Collaborated within an **Agile** environment using **Git** for version control and **Jira** for structured issue tracking and sprint management.

Education

B.Sc. in Computer Science

2023 – 2026

University of Colombo School of Computing, Sri Lanka

G.C.E. Advanced Level

2019 – 2021

Physical Science Stream – Rahula College, Matara

Projects

Busmate LK – Smart Public Bus Transportation System

Final Year Project

- Contributed to a team-built platform using **Core Java** and **Spring Boot** to develop backend microservices and **RESTful API servers** handling real-time bus operations.
- Implemented **inter-service communication** across four microservices — user, routing, scheduling, and ticketing — each with an isolated **SQL database (PostgreSQL)**.

- Handled **code deployments and releases** on **AWS EC2** within a **Docker**-based microservices architecture, with emphasis on **CI/CD automation**.
- Participated in **design reviews** and collaborated with team members to translate requirements into functional backend features.
- **Tech Stack:** Spring Boot (Java), PostgreSQL (Supabase), React Native, TypeScript, Next.js, AWS EC2, Docker, Tailwind CSS, Microservices Architecture.

Ferris the Librarian – Privacy-First Offline RAG Assistant2026

- Built an **agent-based AI assistant** using local LLMs and RAG architecture — directly demonstrating experience with **agent-based coding assistant tools**.
- Designed a hallucination-resistant retrieval pipeline with semantic chunking, **vector search**, and source-backed response generation.
- **Tech Stack:** Python, LangChain, Ollama, Llama 3, ChromaDB, Streamlit, RAG Architecture.

ServeSmart – Restaurant POS SystemJun 2025 – Dec 2025

- Developed a full-stack POS application with **RESTful backend APIs**, **MongoDB** schemas, and a responsive **React** frontend with Redux state management.
- Implemented authentication, real-time order processing workflows, and operational tracking features.
- **Tech Stack:** MongoDB, Express.js, React.js, Redux, Node.js (MERN Stack).

SoulGift – Full-Stack E-Commerce PlatformOct 2024 – Apr 2025

- Built a full-stack platform with **JWT authentication**, secure order processing, and an admin dashboard with full **CRUD operations**.
- Designed and optimized **SQL database** interactions and **RESTful APIs** for efficient product and order management.
- **Tech Stack:** Laravel (PHP), MySQL, HTML5, Tailwind CSS, JavaScript, AJAX, Git.

Skills

Languages	Java (Core), JavaScript, TypeScript, PHP, C
Frontend	React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Redux, AJAX
Backend	Spring Boot, ASP.NET Core, Node.js, Express.js, Laravel
Databases	MySQL, PostgreSQL, MongoDB (SQL & NoSQL)
DevOps & CI/CD	Git, Bitbucket, Docker, CI/CD Pipelines, AWS EC2, Deployment Automation
AI & Agents	Gemini LLM API, Agent-Based AI Tools, RAG Architecture, LangChain
Tools	Jira, Postman, Swagger, Git, Confluence-style documentation
Concepts	Microservices Architecture, RESTful APIs, OOP, Agile/Scrum, Code Reviews, Secure Development
Soft Skills	Peer code reviews, Cross-functional collaboration, Technical documentation, Problem solving

Certifications

- **AWS Educate: Introduction to Cloud 101** – Amazon Web Services
- **Mastering CI/CD Pipelines – Hands-On Guide** – Learnfi.lk
- **The Complete Web Development Bootcamp** – Udemy (Dr. Angela Yu)

Extracurricular Activities

- **Volunteer** – UCSC Career Fair 2025, assisting in event organization and participant coordination.
- **Co-director** – Rotaract Club of UCSC (2024–2025), leading sports and recreational activities to improve member engagement.
- **Sports Day Participant** – Zebra Technologies (2025–2026), engaged in company cricket and sports day events fostering team collaboration.
