Manusha Ranaweera

Software Engineering | SpringBoot | Asp.Net Core | AI & ML
Enthusiast | CS graduate @ UCSC | Ex SE intern @Zebra
technologies

Colombo, Western Province, Sri Lanka

Summary

Software Engineer with hands-on experience building production-grade, full-stack web applications across enterprise and academic settings. At Zebra Technologies, I engineered enterprise web applications using React, TypeScript, and ASP.NET Core — including an AI-powered chat assistant integrated with the Gemini LLM API that enabled context-aware data retrieval for internal teams. I also designed scalable RESTful APIs and contributed across the stack in an Agile environment using Git and Jira. My project work spans the full modern stack: MERN (MongoDB, Express, React, Node.js), Spring Boot microservices deployed on AWS EC2, Laravel, and Next.js — across domains including healthcare, e-commerce, transport, and restaurant management. Completing my B.Sc. in Computer Science at the University of Colombo School of Computing (2026). Open to full-time Software Engineering roles — locally or remotely — where I can keep building things that matter. Tech: React · TypeScript · Node.js · ASP.NET Core · Next.js · Spring Boot · MySQL · PostgreSQL · MongoDB · AWS · Git

Experience

Zebra Technologies

7 months

Software Engineer Intern

November 2025 - May 2026 (7 months)

Sri Lanka

Delivered production-grade enterprise applications at Zebra Technologies using

ASP.NET Core, TypeScript, and React within an Agile/Scrum team.

- Designed and implemented scalable RESTful APIs and backend services, applying

software design patterns to support seamless system integration.

- Built an AI-powered chat assistant by integrating the Gemini LLM API with

backend databases and Entity Framework Core / SQL Server.

- Participated in code reviews and debugging, contributing to continuous improvement of code quality across the codebase.
- Authored technical documentation covering system architecture, API design, and developer onboarding.
- Collaborated in sprint planning, daily stand-ups, and retrospectives, using Git for version control and Jira for backlog management.

Software Engineer Intern

November 2025 - May 2026 (7 months)

Colombo

Education

University of Colombo School of Computing

Bachelor of Science in Computer Science, Computer Science · (May 2023 - June 2026)

Rahula College

G.C.E. Advanced Level, PHYSICAL SCIENCES · (June 2017 - August 2021)
